

News information file repository for the media

The purpose of this service is to provide the media with news information as it emerges throughout the election day for the 2021 Parliament of Catalonia elections which are being held on the 14th of February. The media must adapt the news information provided to their own specific needs.

The service consists in creating a news information repository, which is a website where authorised users can download files containing the information they want.

The files in the repository and the news information available on the results website that is accessible by Internet will be periodically updated as new information emerges. In this way, the news information shown on the results website will be coherent with the information stored in the repository.

In order to ensure the service level with the utmost security guarantees, predefined usernames and passwords will be activated which allow access to the system in order to download the news information.

The sections below outline the content and format of the news information available to users of this service.

Downloadable files:

There are two kinds of downloadable files:

- Those which are updated as new information is received in the system, and which reflect the situation at any given time. The following files fall within this type:
 - File on total voter turnout updates: It contains information on total participation by county (*comarca*), district and the Catalonia as a whole.
 - File on total voter turnout updates by municipalities: It contains information on total voter turnout by municipality.
 - Files on tentative vote counts: They contain information on the total tentative vote counts by county (*comarca*), district and the Catalonia as a whole.
 - Files on tentative vote counts by municipalities: They contain information on the total tentative vote counts by municipality.

Auxiliary files which remain unchanged from the start of election day. The following files fall within this type:

- File on candidacies: This contains information on the candidacies submitted.
 - File on candidates: This contains information on the candidates running in the different candidacies.
 - Files on total vote counts from the previous election: They contain information on the definitive vote count from the previous elections by county (*comarca*), district and the Catalonia as a whole.
 - Files on municipalities from the previous election: They contain information on the definitive vote count from the previous elections by municipalities.
 - File on candidacies in the previous election: This contains information on the candidacies submitted in the previous elections.

All the downloadable files on these pages have the following characteristics:

- Fields delimited by separators ";"(semicolon).

In the "percentage" fields, the last two positions on the right are CONSIDERED decimals.

The lengths listed below in the file designs do **NOT** include the field separator.

The files are compressed with "gzip" and are compatible with the majority of compression programmes such as WinZip, Winrar, etc.

File on total voter turnout updates: This is the format of the files which provide updates on total voter turnout updates (Catalonia, districts and comarca [county]).

Description	Length
Dispatch number <i>(It is advised the use of this field for <u>data file version control</u>)</i>	3
Record identifier: <ul style="list-style-type: none"> ▪ Entire Catalonia = "CM" ▪ District = "CI" ▪ Comarca (county) = "CR" 	2
Catalonia code = "09"	2
District / comarca (county) code	2
